Functionality in Emergency Situations

All mobile switching centers and cell sites have battery backup power. Also, each switching center has a dedicated diesel generator and there are several cell site generators in the market area. In instances of power outages, priority is set based upon traffic, cell site location and time of day. In certain part of the service area, a cell on wheels (COW) can be deployed. In case of a total switch outage, a mobile command center may be established by each switch vendor.

Functionality in Emergency Situations

All mobile switching centers and cell sites have battery backup power. Also, each switching center has a dedicated diesel generator and there are several cell site generators in the market area. In instances of power outages, priority is set based upon traffic, cell site location and time of day. In certain part of the service area, a cell on wheels (COW) can be deployed. In case of a total switch outage, a mobile command center may be established by each switch vendor.

Functionality in Emergency Situations

All mobile switching centers and cell sites have battery backup power. Also, each switching center has a dedicated diesel generator and there are several cell site generators in the market area. In instances of power outages, priority is set based upon traffic, cell site location and time of day. In certain part of the service area, a cell on wheels (COW) can be deployed. In case of a total switch outage, a mobile command center may be established by each switch vendor.
